Other Shapes, Sizes, and Templates Made Easy:

- OMC Archtrim offers heat formed trim in numerous shapes such as full round, oval, and elliptical. Please call or fax your request.
- When templates are required common house wrap etched with a pencil over the shape is ideal and can easily be mailed to OMC Archtrim.
- Vinyl window manufacturers have difficulty in providing precise curved shapes. Many are not made with a true radius. If difficulty in fitting Archtrim curved trim boards develop, a field template will be required.
- Templates are frequently required for ellipses, ovals, restoration projects & some vinyl windows.

Shipping:

- OMC Archtrim ships by in one piece when size permits.
- Larger sizes are pre-assembled in our shop and pocket screwed for easy re-assembly at the jobsite.
- Orders are poly bagged and packaged in corrugated boxes to prevent damage during shipping and handling.
- OMC ships by UPS direct to dealers or to the product consumer on request.

*Most cellular PVC board will loose the wood grain depth when heated

OMC Archtrim 810 E. Mt. Hope Ave. Lansing, MI 48910
